HEALTH BENEFITS AND STRESS FREE LIVING

STRESS RELIEF

Stress results in muscle tension, headaches, fatigue and soreness. Regular hot tub use, through a combination of buoyancy, heat and massage relieves tension and stress.

Buoyancy eases pressure in joints and muscles, while heat increases blood flow to muscles and accelerates healing. Additionally, hot tub jets provide therapeutic massage, stimulating the release of endorphins; the body's natural painkiller.

LOWERS BLOOD PRESSURE

A recent study for the Mayo Clinic recommended that relaxing in a hot tub can be beneficial for heart disease patients. The study showed that relaxing in a hot tub is less stressful on the heart and more beneficial than working out on an exercise bike!

The study also demonstrated that soaking in the hot tub for as little as 15 minutes will lower blood pressure.

PROMOTES WEIGHT LOSS

Regular hot tub use has also been linked to weight loss. In clinical studies, patients who used hot tubs lost an average of 3.5 pounds without any new diet or physical exercise. The hot water massage simulated the effects of exercise on the muscles, gradually helping them lose weight.

SLEEP MORE SOUNDLY

No more counting sheep! According to the National Sleep Foundation, 30 million Britons suffer from mild to chronic insomnia and other sleep disorders. A study in the journal 'Sleep' showed that soaking in a hot tub prior to bedtime will not only help you fall asleep, but will provide a deeper, more relaxing sleep as the body cools.

LOWER DIABETIC BLOOD SUGAR LEVELS

The New England Journal of Medicine found that bathing in a hot bath simulates the beneficial effects of a hot tub. Studies revealed that patients with type 2 diabetes, who soak in a hot tub for 30 minutes a day, 6 days a week for 3 weeks, experience a reduction in blood sugar levels by an average of 13%.

MINIMISE THE PAIN OF ARTHRITIS

For people with arthritis, the Arthritis Research Campaign recommends using a hot tub as an excellent way to apply heat to arthritic joints. A relaxing soak in a hot tub can help with muscle relaxation, decreased pain and joint stiffness and greater ease when performing exercise and daily activities.

PROUDLY MANUFACTURED IN THE UNITED STATES OF AMERICA

MADE IN THE USA

The hot tubs we see today were first created in the United States of America back in the 60s and that experience through the decades has enabled the US manufacturers to build the world's very best spas. Quality and innovation through past experiences.

LIFETIME STEEL STRUCTURE WARRANTY

Our steel structure carries a lifetime warranty. This means for the lifetime of your ownership you can feel secure knowing any component of the structural frame will be replaced or fixed to factory specifications.

VITA SPA'S HISTORY

Way back in the 1970s Vita Spas were launched in the USA at the very start of the hot tub industry as we know it. Now produced in Arizona by the MAAX Spas Industries Corporation by a team of people that are proud of their work and live by their reputation. Many employees at MAAX have been there for over 25 years so they know a thing or two about building spas.

Building a great spa takes a lot of experience and knowledge. To be able to offer a lifetime warranty on our steel frames and patented insulation is no easy task and took many years to perfect these extremely important features built into our 500 & 700 series range.

You can be assured that buying a Vita Spa is a sound investment into your family's future and it will bring many happy years of enjoyment. We don't cut corners like other brands to offer cheap spas that are built on a budget. At Vita Spas we stand by our quality and reliability. You can truly relax when buying a spa from us.

LIFETIME INSULATION WARRANTY

The insulation system in your new Vita Spa hot tub is warranted to maintain the same insulation value as it had at the time it was manufactured. As you enjoy your spa over the years, you'll feel secure knowing it can be maintained at the same high level of efficiency as the day it was made.

NORTHERN EXPOSURE INSULATION

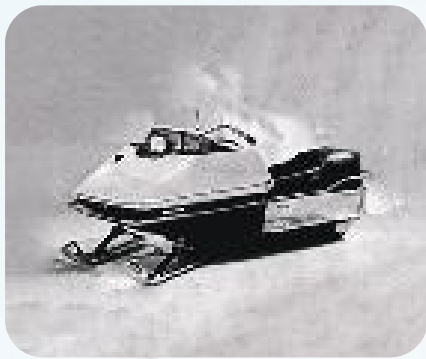

Is a unique thermal barrier technology that recycles the free heat energy for more efficient heating. All four sides of the spa, plus the floor and cover, are lined with copper material to reflect radiant heat energy generated from the pumps back into the spa.

A BRIEF HISTORY OF VITA SPA

1969

ORIGIN OF MODERN FIBREGLASS

Begins with the production of snowmobile shrouds & swimming pools.

1987

MAAX IS BORN

Listing on Montreal Stock

Another innovation from MAAX Spas, Northern Exposure featuring 3M Thinsulate Insulation a breakthrough in hot tub insulation.

2020

WORLD'S GREATEST

Featured on The World's Greatest TV show, explaining why our spas are one of the world's best.

ENVIRONMENTALLY FRIENDLY AND ENERGY EFFICIENT

ELECTRICITY COSTS HAVE RISEN SHARPLY IN THE LAST FEW YEARS

Running costs have become an important issue when purchasing a spa. Most spas produced over 10 years ago were not manufactured with the same attention to this issue so many spa owners with an older model may find an upgrade is a worthwhile option to achieve lower running costs.

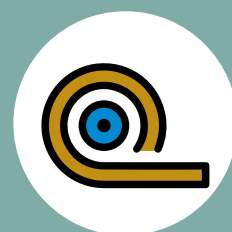

All our spas are manufactured using the very latest eco-friendly systems using recycled materials wherever possible to provide extremely low running costs.

This is achieved in a variety of ways. Firstly, we provide a complete envelope of insulation to prevent heat loss via the spa itself. Secondly, we use reflective technology to again push the heat back into the spa water. Thirdly, we recycle the wasted heat created by the spa pumps and again push this heat back into the spa.

Northern Exposure® is the ultimate hot tub insulation system. This unique thermal barrier technology recycles the free heat energy for more efficient heating and lower energy costs. All four sides of the spa, plus the floor and cover are lined with reflective copper material.

The **Vital Energy Insulation System** features eco-friendly insulation made from recycled natural fibre. This insulation contains no chemical irritants and is treated with a borate-based solution to prevent mould/mildew growth and pest infestation.

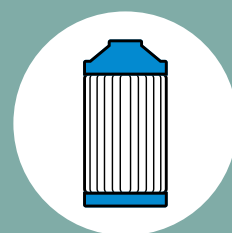

CleanZone™ II UVC light is the same technology utilized in many communities around the world to purify drinking water. CleanZone™ II kills 99.9% of microorganisms, bacteria, viruses and parasites, making this the perfect system for your hot tub sanitization system.

The **CleanZone™ Ozone System** is a cartridge oxidizer that is used to oxidize and clean your spa water. This water purification system will automatically maintain healthy, crystal clear water while reducing chemical maintenance.

CleanZone™ Ozone System together with the **CleanZone™ II UVC** light technology, passes water through our dual filtering system to ensure that the maximum amount of water flows through the filter before it re-enters the hot tub. What does this all mean? Crystal clear water, minimal maintenance and a healthy, purifying experience for you.

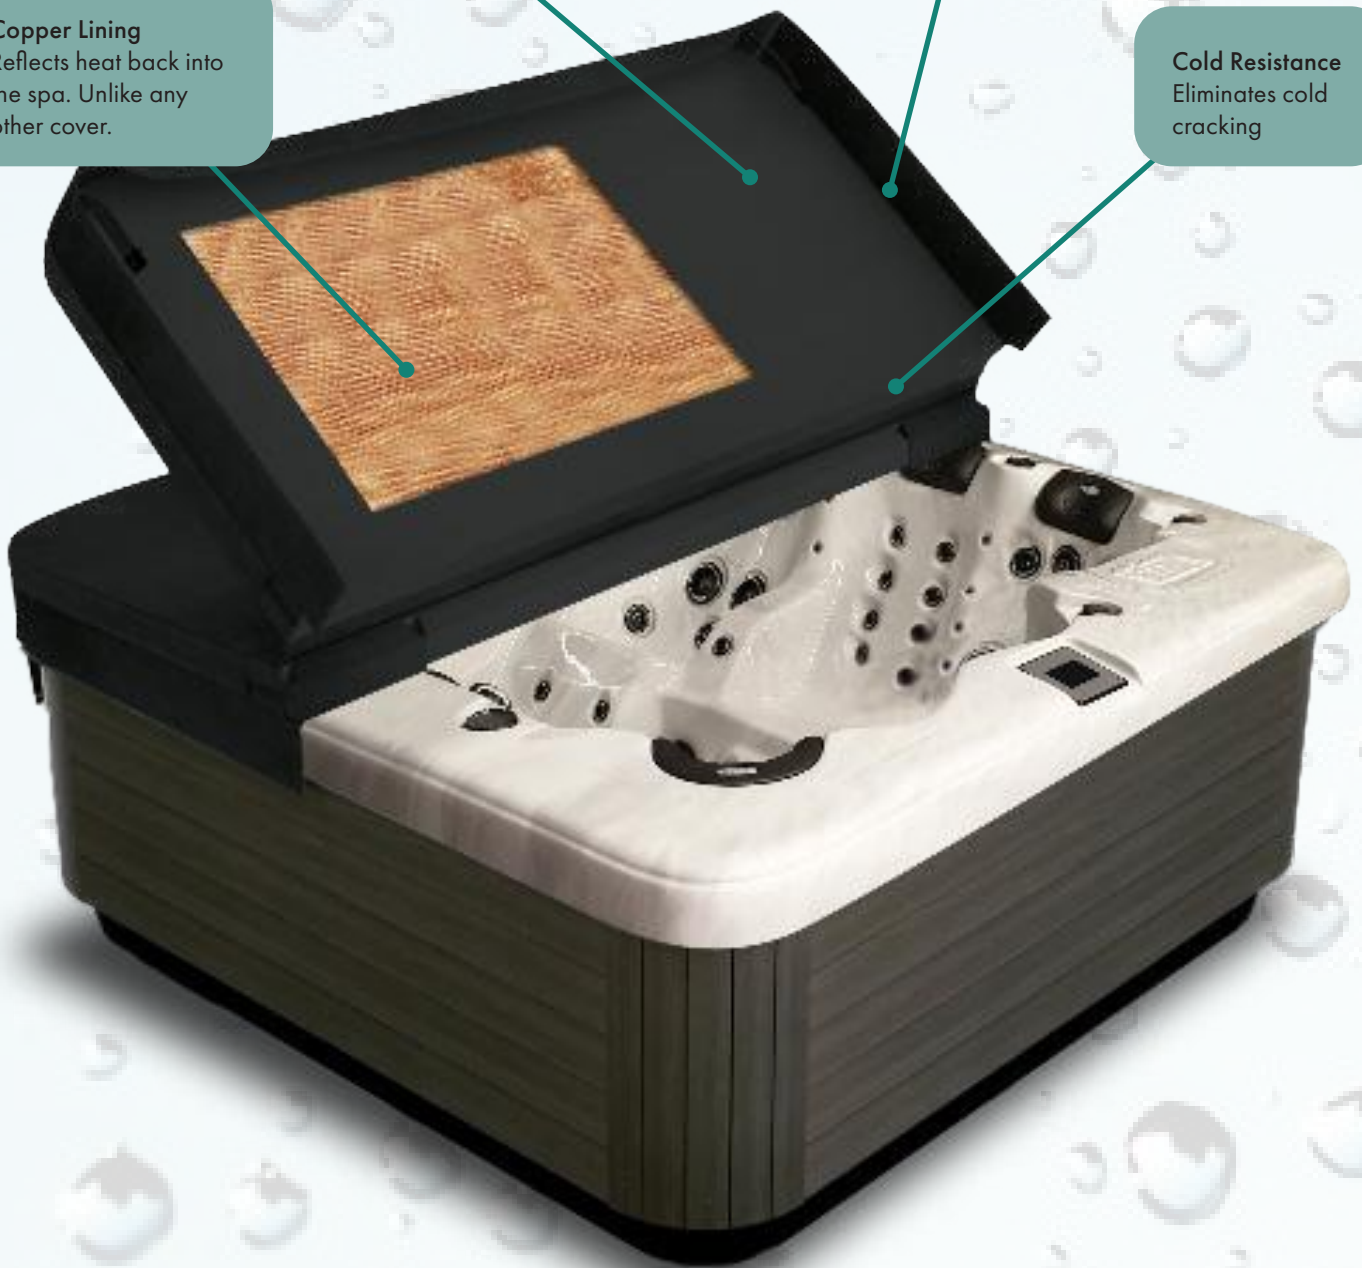

SHELL / CABINET COLOUR OPTIONS

Sun Resistance
Superior sun and
fade resistance

Lightweight
Overall cover is
25% lighter than
standard covers

Copper Lining
Reflects heat back into
the spa. Unlike any
other cover.

Cold Resistance
Eliminates cold
cracking

ACRYLIC COLOURS

Vita Spa hot tubs are finished in an attractive interior made from continuous cast acrylic. This is superior to ethylene "soft plastic" surfaces. The hard, non-porous surface resists stains, fading, scratches and chemical abuse. With the look of granite, pearl or metalescence, the extremely rugged and durable finish offers beauty and peace of mind.

COVANA AUTOMATED HOT TUB COVERS

THE COVANA HOT TUB COVER IS YOUR KEY TO HAPPINESS!

What if you could access your hot tub with the simple turn of a key without ever again having to struggle with opening a cover or removing snow, ice or other debris? With Covana, you can equip your spa with one of the highest insulation covers on the market and then transform it into one of the most easily accessible.

All within a mere 20 seconds and little effort!

Covana systems are more than just hot tub covers. They are also completely automated gazebos which offer you maximum comfort, safety and intimacy. Made in Canada using the latest, state-of-the-art materials, our products are designed to endure the most rigorous climates while saving you money on unnecessary water, heating bills and maintenance products.

Well-being

EVOLUTION

Hot Tub Cover

The Evolution offers the greatest range of possibilities to fit larger and round hot tubs.

HORIZON

Avant-garde tilt spa cover

The Horizon model lets you benefit fully from your spa while protecting you from the sun's rays and bad weather.

Neptune Spas Ltd was started over 15 years ago to provide high quality hot tubs, swim spas, saunas, log cabins and bespoke garden buildings at affordable prices.

Family business offering a quality service

We are a local, family business and take pride in the quality service we provide; we want to ensure that our customers have the best experience they can when they buy from us. Our knowledge and local expertise are second to none – our referrals and repeat business is significant and reflects the level of customer care and service we constantly strive for.

Neptune Spas has exclusive dealership agreements with three of America's leading hot tub manufacturers, all companies have been trading in excess of 40 years in America, in what is an extremely competitive marketplace.

Luxury products

We supply directly from three main warehouses and deliver direct to your site. We only use our own, qualified installation team so we can keep control of the delivery and installation process. This also means we can at times, deliver to you at short notice, subject to warehouse clearance and stock availability.

The luxury products we supply offer the very best in the industry – unrivalled quality and leading-edge technology with many features being exclusive to these brands.
