"The Swimspa range by Spa De La Mare is an all year round swimming machine and hydrotherapy massage spa in one, for indoor or outdoor."

Dean Gallienne
Managing Director

Introduction

Relaxing

You want to enjoy the health benefits of a swimming pool. But you can't really justify the time and trouble that maintaining a full size pool demands.

The Swimspa range by Spa De La Mare is an all year round swimming machine and hydrotherapy massage spa in one, for indoor or outdoor use. While the Turbo Spa range offers state of the art hydrotherapy spas, adaptable for any location.

Spas that will invigorate your life, for a lifetime.

Invigorating

For relaxation, massage and total well-being, the effects of bubbling water are incomparable for maintaining shape,

promoting blood circulation and re-oxygenating skin cells, relieving tension, fatigue, rheumatism and arthritis. You can enjoy the benefits every day with a Spa De La Mare Turbo spa or Swimspa.

Enjoy an invigorating swim at one end and a relaxing massage at the other in our exclusive Swimspa range and the Turbo Spa is unrivalled in providing head to toe hydrotherapy massage.

Work the body and relax the soul.

Revolutionary

Created using the same concept as our Turbo Spa pools, our Swimspa range offers an unmatched quality with a finish of Briare porcelain which gives them a unique character. They offer the maximum of comfort in the minimum of space. With reduced water volume, the swimming pool spa has a capacity for use greater than a traditional swimming pool, whilst also being more user-friendly.

The Swimspa comes complete with swim jets, equipped with a supercharger and air blower, a patented compressed air massaging system, as well as the famous Venturi Massager.

Equipped with an exclusive design of swimming against a current, our swimming spas are provided with 3 swim jets, augmented by 3 high-powered, automatic pumps which can be adapted to the needs of the swimmer (25 to 90 cubic metres per hour). Easy to maintain, they are equipped with a very efficient insulation system.

Maximum comfort.

Hydrotherapy

The use of water for therapy has been carried out for hundreds of years and now forms a large part in medical practice to benefit our health and wellbeing.

Multi-jets and hydrotherapy jets are incorporated to massage the body which stimulates the lymphatic system and flushing toxins; reduces muscle fatigue and pain; rehabilitates injured muscles; boosts the immune system; encourages detoxification; relieves stress.

Hydrotherapy is used to treat many illnesses and conditions including:

- Acne
- Arthritis
- Colds

- Depression
- Headaches
- Stomach problems
- Joint, muscle, and nerve problems
- Sleep disorders
- Stress

The benefits of hydrotherapy include:

- Dramatically increasing the elimination of waste, thus assisting detoxification
- Loosening tense, tight muscles and encouraging relaxation
- Increasing the metabolic rate and digestion activity
- Hydrating the cells, improving skin and muscle tone
- Boosting the immune system, allowing it to function more efficiently
- Improving the function of the internal organs by stimulating their blood supply

Refreshingly cutting edge

The manufacturing and installation process is in the capable hands of our skilled and experienced craftsmen. Depending on the chosen model, the shell is fabricated from a resin selected to give the most ergonomic design. Once this is set hard a mosaic is created with Emaux de Briare Harmonies porcelain 25mm x 25mm tiles to the design and colour scheme you choose, accentuating the flowing contours of the pool.

Once the pool is completed, it is tested and then set into a polyurethane foam to create the best and most efficient thermal insulation. This process, unique throughout the world, stiffens the structure, renders it portable, and provides protection for the associated pipe-work. It also provides a density of insulation and a protection for the pool which are unmatched in the market-place, and guarantee long life and extremely low running costs. All pools can be directly set into the earth or above ground. Designed and built to exacting standards, our hydrotherapy pools are the finest of their type available today. We export and install our handcrafted pools worldwide and take great pride in providing a personal and professional service to every customer.

Designed specifically for the European climate, these spas are very energy efficient both in power output and heat retention. The mosaic tiled finish is standard and clients have a choice of 36 tile colours and endless designs to create a unique finish to their pools.

Leading the world in spa manufacture

Because the Swimspa product is tailored to suit your needs, it can be anything you want it to be.

A statement in style and opulence, built to last a lifetime, a social hangout, or an invigorating workout.

Whatever the reason, the Swimspa range can be enjoyed for a lifetime whatever time of day, whatever the season, either indoor or outdoor.

For your life, for a lifetime.

Cleopatra II

Short End

The baby of the brigade, the Cleopatra II SE is a cosy little number but enjoys the same opulence as its big sisters.

Perfect for smaller gardens or conservatories. The Cleopatra II SE is the most affordable, usable and efficient swimming machine around. Whatever time of year, enjoy the benefits of a unique hydrotherapy massager at one end of the pool with an invigorating set of controllable swimming jets at the other.

Size range : 4-8 metres long, 2.5 metres wide, 1.45 metres deep.
Speckled area indicates polyurethane lining.

Features

- Fully tiled in Emaux de Briare porcelain tiles
- 3 x 180gpm swim jets with air and water flow control
- 2 x 30gpm front access skimmers
- 16 x 12 gpm hydrotherapy jet with air and water control spa end (water control valve fitted)
- 18 x 15 gpm hydrotherapy jet with air and water control spa end (water control valve fitted)
- 8 x Air induced massage jets
- 1 x multi-coloured or white underwater light
- Stainless steel Swim jet rail
- All fittings finished in stainless steel
- Water tested
- Floating thermal heat retention cover
- All return and suction flow rates are designed to meet all safety requirements

Cleopatra II

Slightly longer, with Cleopatra II the beauty of a Swimspa really begins to take shape.

Just as energy efficient as the smaller Swimspa and benefiting from incredible heat retention, which means these Swimspas won't put a drain on your consumption. This means you can use the pool instantly, at a temperature to suit, whenever you want.

Size range: 6-8.5 metres long, 2.5 metres wide, 1.45 metres deep speckled area indicates polyurethane lining

Features

- Fully tiled in Emaux de Briare porcelain tiles
- 3 x 180 gpm variable swim jets with air and water flow control
- 2 x 30 gpm front access skimmers
- 16 x 12 gpm hydrotherapy jets with air and water flow control
- 16 x 15 gpm multi hydrotherapy jets with air and water flow control
- 8 x multi hole air induced massage jets
- 4 x 200 gpm suction
- 2 x multicolour underwater lights
- All fittings finished in stainless steel
- Water tested
- Floating thermal heat retention cover
- All return and suction flow rates are designed to meet all safety requirements

Cleopatra III

The longest of our Swimspa range and a great place to unwind after a busy day or for friends and family to all enjoy in comfort.

This swimspa really is the ideal swimming pool alternative - the room to move combined with the health benefits of the swimming jets and the hydrotherapy benefits of the multi-spa jets, all beautifully hand tiled in a mosaic finish of your choice.

Size range : 7-9 metres long, 3 metres wide, 1.45 metres deep speckled area indicates polyurethane lining.

Features

- Fully tiled in Emaux de Briare porcelain tiles
- 3 x 180gpm swim jets with air and water flow control
- 2 x 30gpm front access skimmers
- 16 x 12 gpm hydrotherapy jet with air and water control spa end (water control valve fitted)
- 18 x 15 gpm hydrotherapy jet with air and water control spa end (water control valve fitted)
- Air induced massage jets
- 2 x multicolour underwater lights
- All fittings finished in stainless steel
- Water tested
- Floating thermal heat retention cover
- All return and suction flow rates are designed to meet all safety requirements

Cleopatra V

The longest of our Swimspa range and a great place to unwind after a busy day or for friends and family to all enjoy in comfort.

This swimspa really is the ideal swimming pool alternative - the room to move combined with the health benefits of the swimming jets and the hydrotherapy benefits of the multi-spa jets, all beautifully hand tiled in a mosaic finish of your choice.

Size Range: 7-9 metres long, 3 metres wide, 1.45 metres deep speckled area indicates polyurethane lining.

Features

High Profile Installations

Spa De La Mare Spas and Swimspas can meet the highest criteria with product and design. Because our range is individually manufactured the Swimspa and Turbo Spa range can be adapted to suit the client's vision, commercially or privately.

All Spa De La Mare Spas and Swimspas can be supplied with a "Water Fall Rim". This allows swimming pool water to circulate through the spa giving constant water changes. Ideal in a Hotel or Leisure Club situation.

Bespoke Projects

Our History

Spa De La Mare

Spa De La Mare are proud to have been the first company to designed and built the UK's first fully tiled spa and swim spa.

Spa De La Mare was founded in 1981 by David De La Mare. A true visionary, he revolutionised the way spas were manufactured, taking energy efficiency to a new level by combing improved power output with more effective heat retention. The addition of quality tiled mosaic finishes added a visual excellence to match this technological advance.

David has passed on the realisation of his vision to the current owners; Dean Gallienne, Mike Fossey and Steve Maynard. Together they have continued in his spirit of innovation and created a range of spas and swimspas of unsurpassed quality.

Spa De La Mare can now confidently claim to be the world's leading manufacturers of fully tiled spa and swimspa, which are now distributed around the world as far afield as Sweden, Norway and Kenya. Mike, Dean and Steve have developed exacting standards for their product based on

a combined 60 years of experience. Their success in the pursuit of excellence has resulted in the company winning 7 consecutive S.P.A.T.A awards for Best Spa Company, providing independent confirmation of the highest standards of quality and service that they offer.

When it comes to installing your spa or swimspa, our team of dedicated technicians see all projects through from start finish. They have worked with everyone from A-list celebrities and royalty to the man in the street - clients that have in common an appreciation of the value and sheer quality of the Spa De La Mare range of products. Whether inside or outdoors our technicians work closely with our clients to create a solution to fit with the ambience of the surrounding environment, whether contemporary or traditional. Whatever you decide, you can relax in the knowledge that safety is a paramount concern in every case.

Tile chart

Harmonies 25 x 25 Porcelain Tiles

The Harmonies selection includes an extensive range of shades, which can be used to give a wide variety of coloured effects. The motif designs are available to order and your own designs can be created, to give that personal finish to any pool. The Harmonies range is supplied on a mesh back to facilitate ease of laying and is fully vitrified and frost proof.

These tiles are meant for reference only, and the colours may differ slightly from the actual tile.
For a more accurate idea, we will be pleased to send samples.
