

Introduction

We don't just build pools, we create memories for your family.

EVi is the culmination of years of development to deliver a simplified solution for the installation of domestic, outdoor swimming pools.

The guided installation process, makes it possible for a construction professional to install a one piece EVi Pool with technical assistance.

EVi

Pronounced "Eevee"

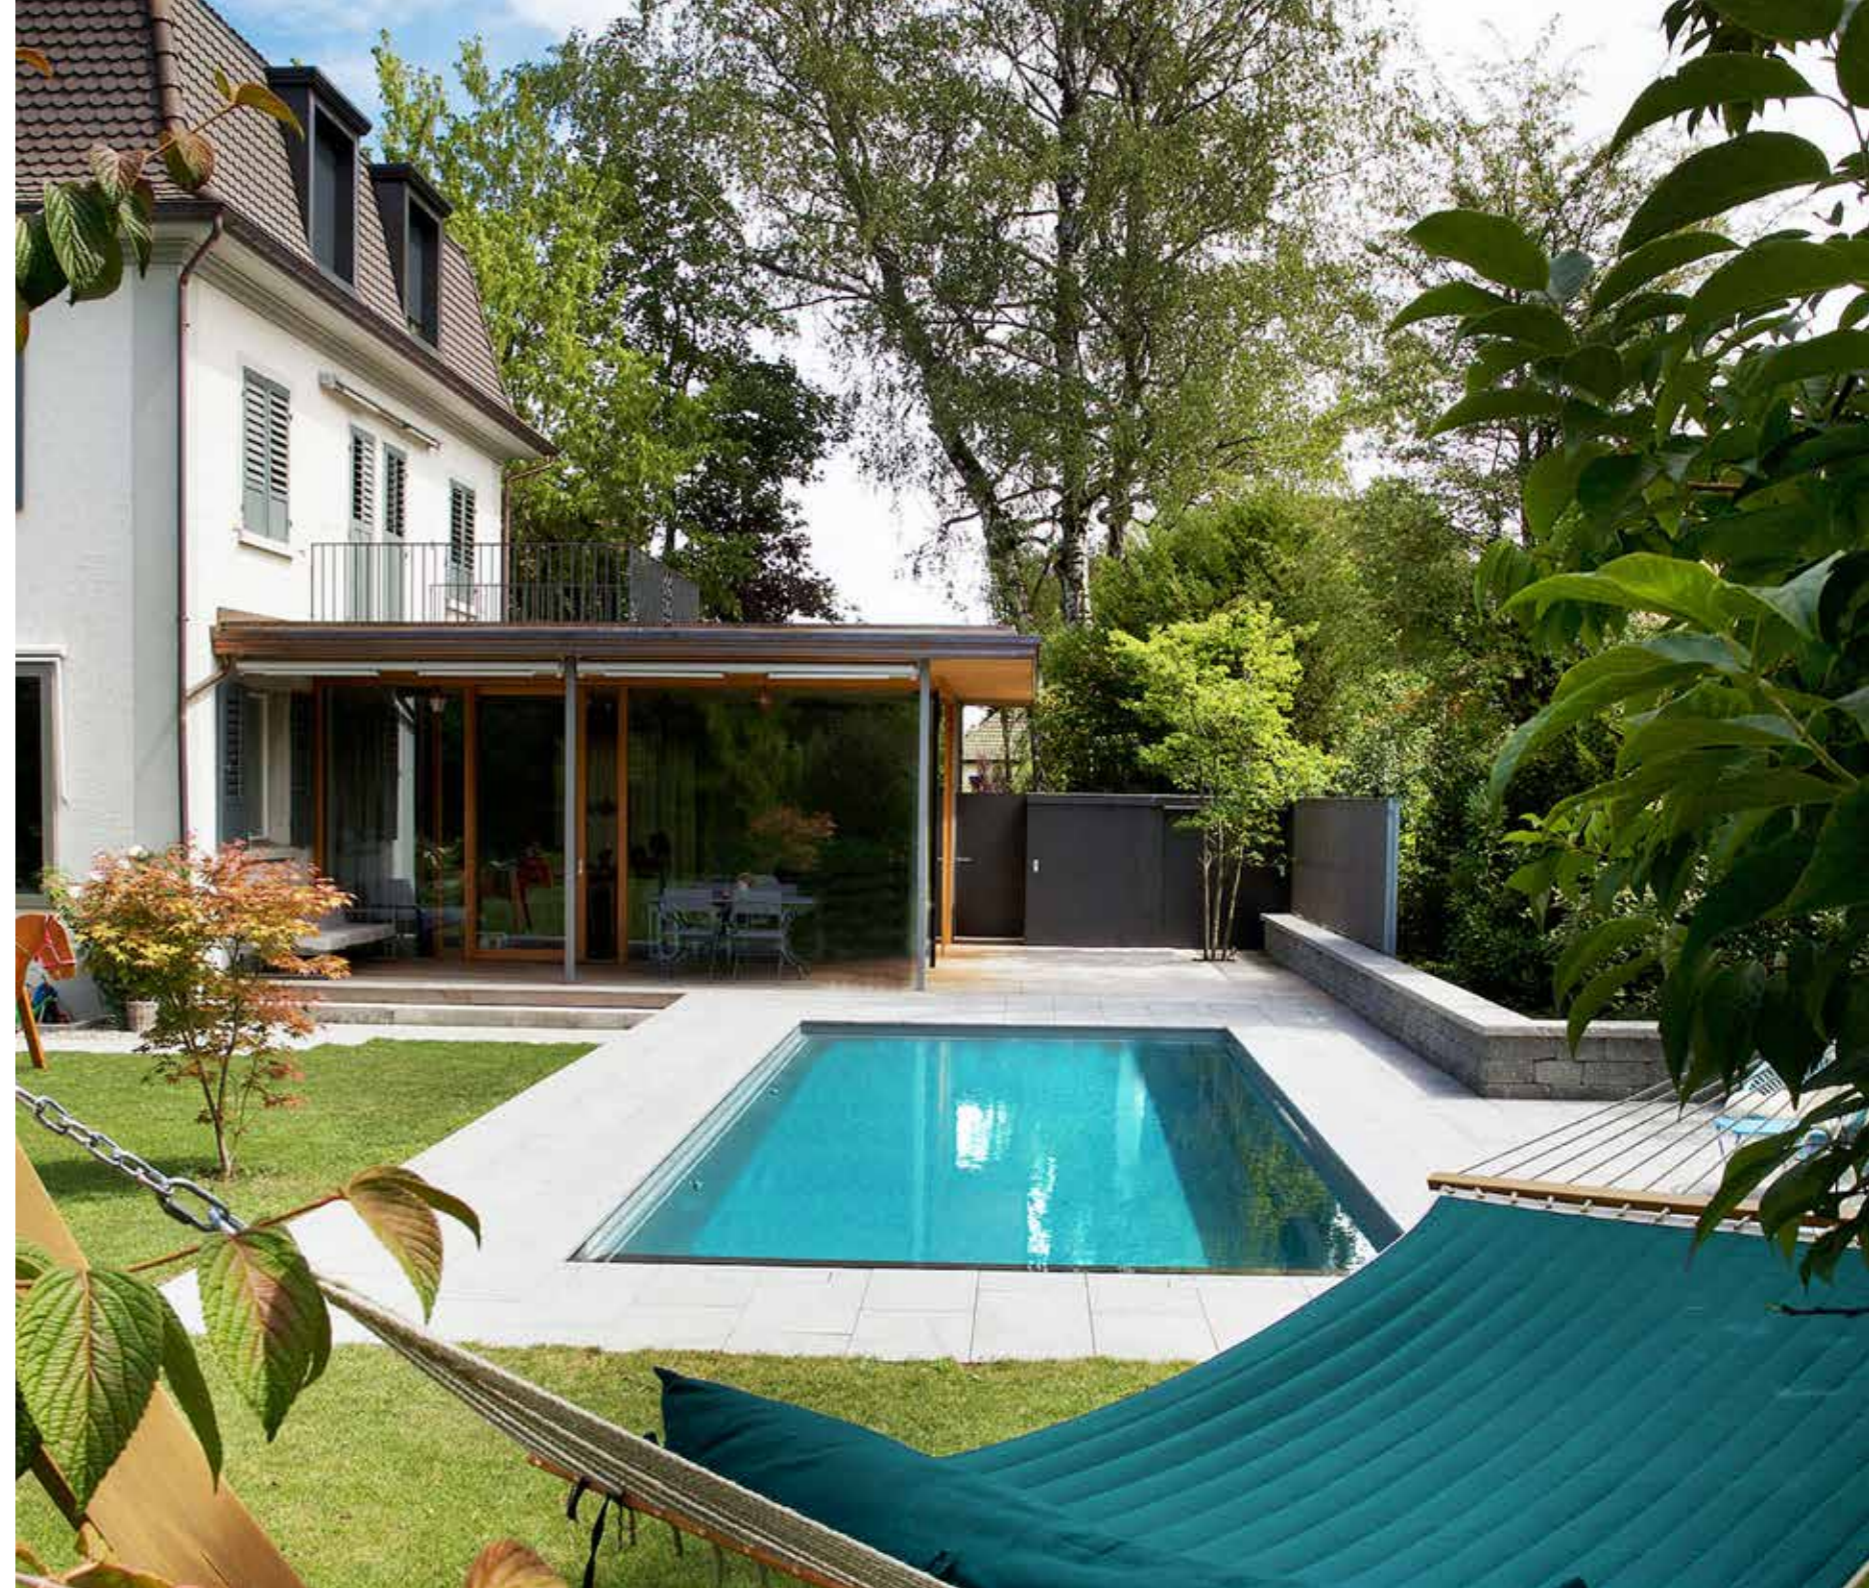

EVi from the name Eve = Source of Life

Source of Life = Water

Source of Life = Family Fun

Pool= Source of Life

An aerial photograph of a dry, hilly landscape. The terrain is characterized by a dense, intricate network of narrow, winding channels and ridges, resembling a complex river system or a topographic map. The colors are muted, with various shades of brown, tan, and grey, suggesting a semi-arid environment. The overall texture is highly detailed and organic.

building
dreams

Clean lines,
beautiful design

Constructed for Design

A pool is an object of luxury and thus the design needs to fit. Over 35 years of design expertise goes into every EVi pool integrating both clean lines and beautiful surface finishes into every construction.

*Relax,
and unwind*

Engineered for Safety

You can be reassured that safety is a priority at EVi Pools because we know, when it comes to keeping your children and pets safe, nothing should be compromised.

All of our models and packages include important in-built safety features giving essential layers of protection to you and your family

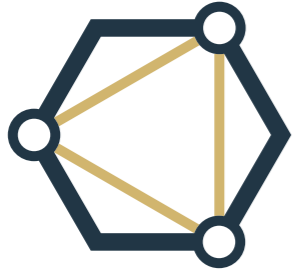

Effortless,
by nature.

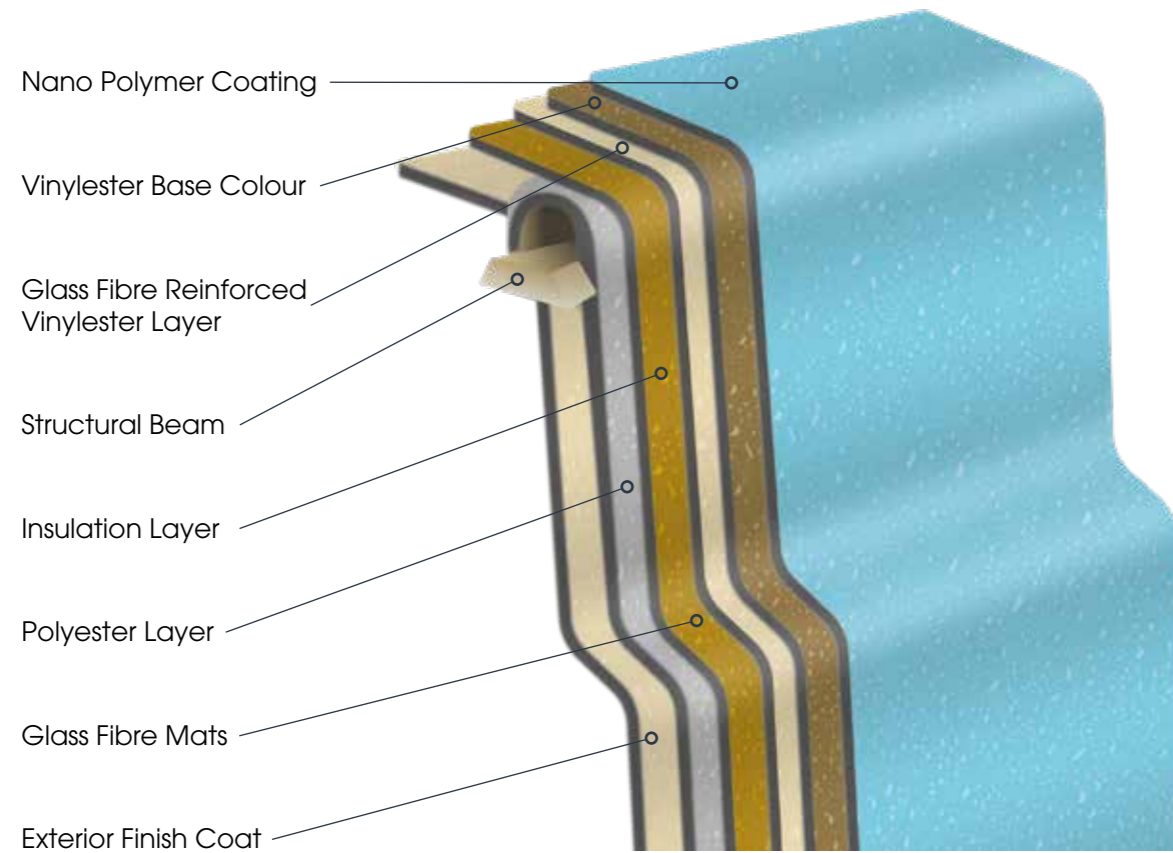

Designed for Simplicity

The cutting edge design of EVi Pools means that they are effortless to maintain, enabling you to spend more of your time doing what is most important to you.

NANO POLYMER COMPOSITE CONSTRUCTION

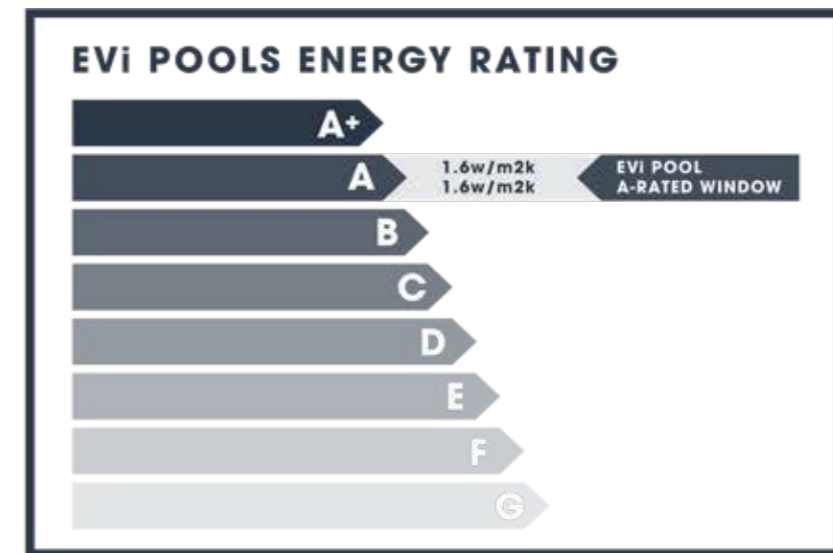

Installed for Economy Built for Longevity

Climate change is a key legacy for the next generation. Sustainable solutions created by cutting edge technology and great engineering are an essential part of making the right choices for the future.

Every EVi Pool is designed to be energy efficient both in power and water. Matching the energy efficiency of an A-rated double glazed window.

Created from the finest materials using Nano Polymer Technology, EVi Pools are sturdy, durable and built to last.

Making the
right choices
for the future

Why choose EVi Pools

See below why an EVi Pool out performs other options in a comparable price range.

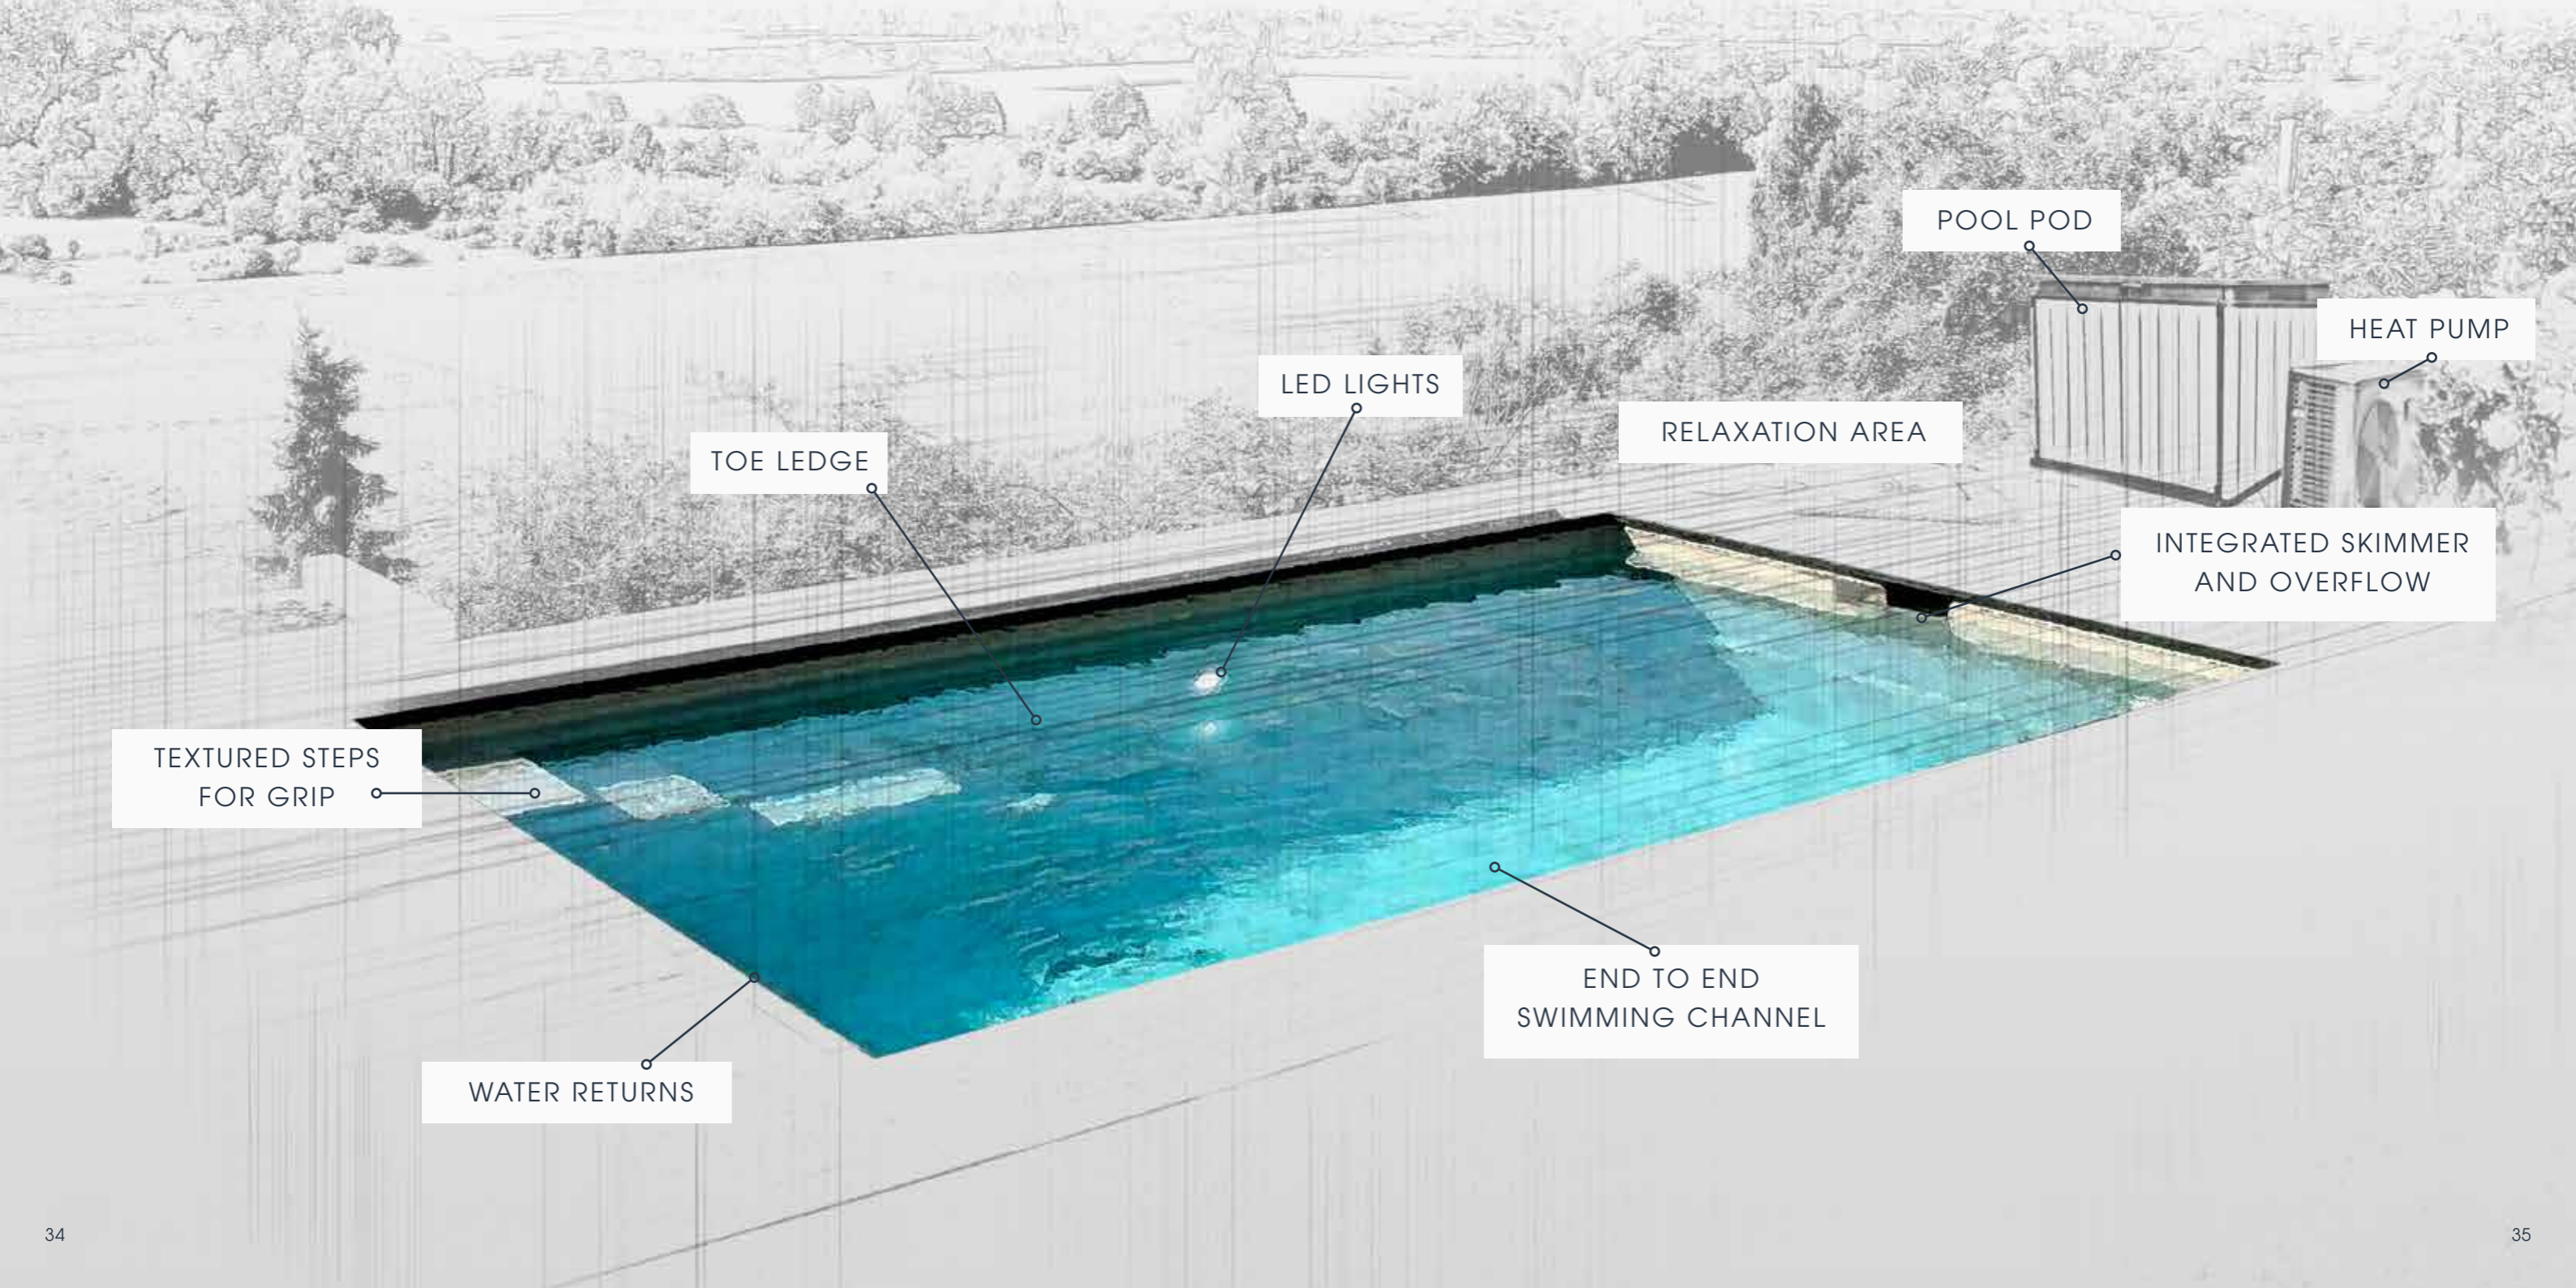

| | EVi | Endless Pool | Swim Spa |
|--|---|--|--|
| Ground Works | Simple hole, base and backfill. | Costly structural retaining walls and blockwork if inground required | Costly structural retaining walls and blockwork if inground required |
| Structure | Full composite construction with nothing to rust or degrade. | Galvanised steel panels which can rust over time | Steel or wood frame to degrade over time |
| Liner | None, part of structure | PVC liner that will need replacing in time | Acrylic liner fibreglass backed can get osmosis on cheap swim spas |
| Location Options | In Ground Only | Above or In Ground | Above or In Ground |
| Drainage (when installed below ground level) | Simple sump tube provided | Sump pump or drainage required | Sump pump |
| Pump Room | Separate dedicated weatherproof PoolPod | Separate equipment pallet that will need housing | Under pool electrics and pump risk flooding and make maintenance difficult |
| Surround | Any option; paving, decking, etc | Aluminium copings | Decking with removable panels |
| Heating | Super efficient Heat Pump (1kw energy = 5kw heat) | Electric heating (1kw energy = 1kw heat) | Electric heating (1kw energy = 1kw heat) |
| Optional Cover | Floating Cover as standard. Optional automatic safety cover | Floating Cover as standard. Optional fabric safety cover. | Heavy hot tub type cover, difficult removal and storage |
| Insulation | Integrated Insulators | None | Spray foam or foil wrap |
| Optional Swim System | Silent Electric Inverter. Powered Turbine for wide smooth current | Noisy Hydraulic Powered Turbine but with a wide smooth current | Usually pumped and jetted with weak turbulent current |

Pool Range

An EVi Pool will give you everything that you need from a pool. Available in three different lengths (6m, 8m and 10m) all designed to fit perfectly in your home.

EVi[™]^X

EVi[™]⁸

EVi[™]⁶

EVi⁶

The EVi 6 is a great, compact choice to suit any outside garden space.

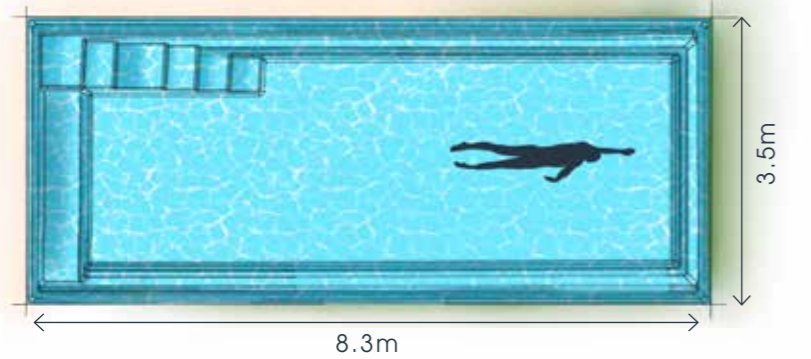

Technical
Drawings

POPULAR

The EVi 8 is our most popular pool, combining both practical size and efficient running costs, fun for all the family.

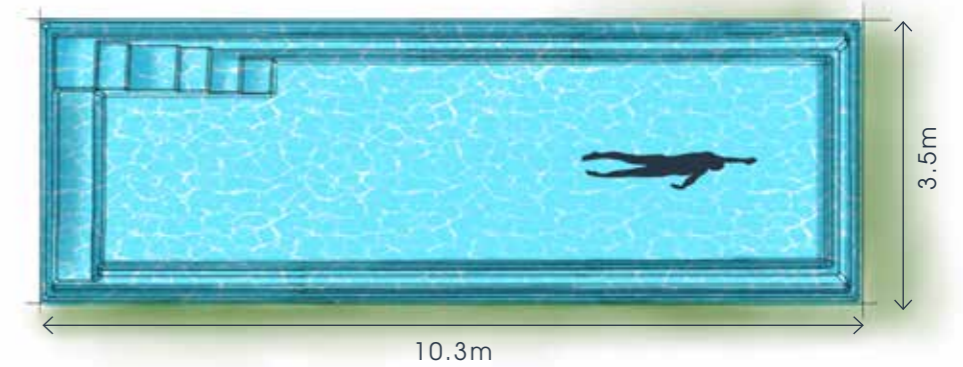

Technical Drawings

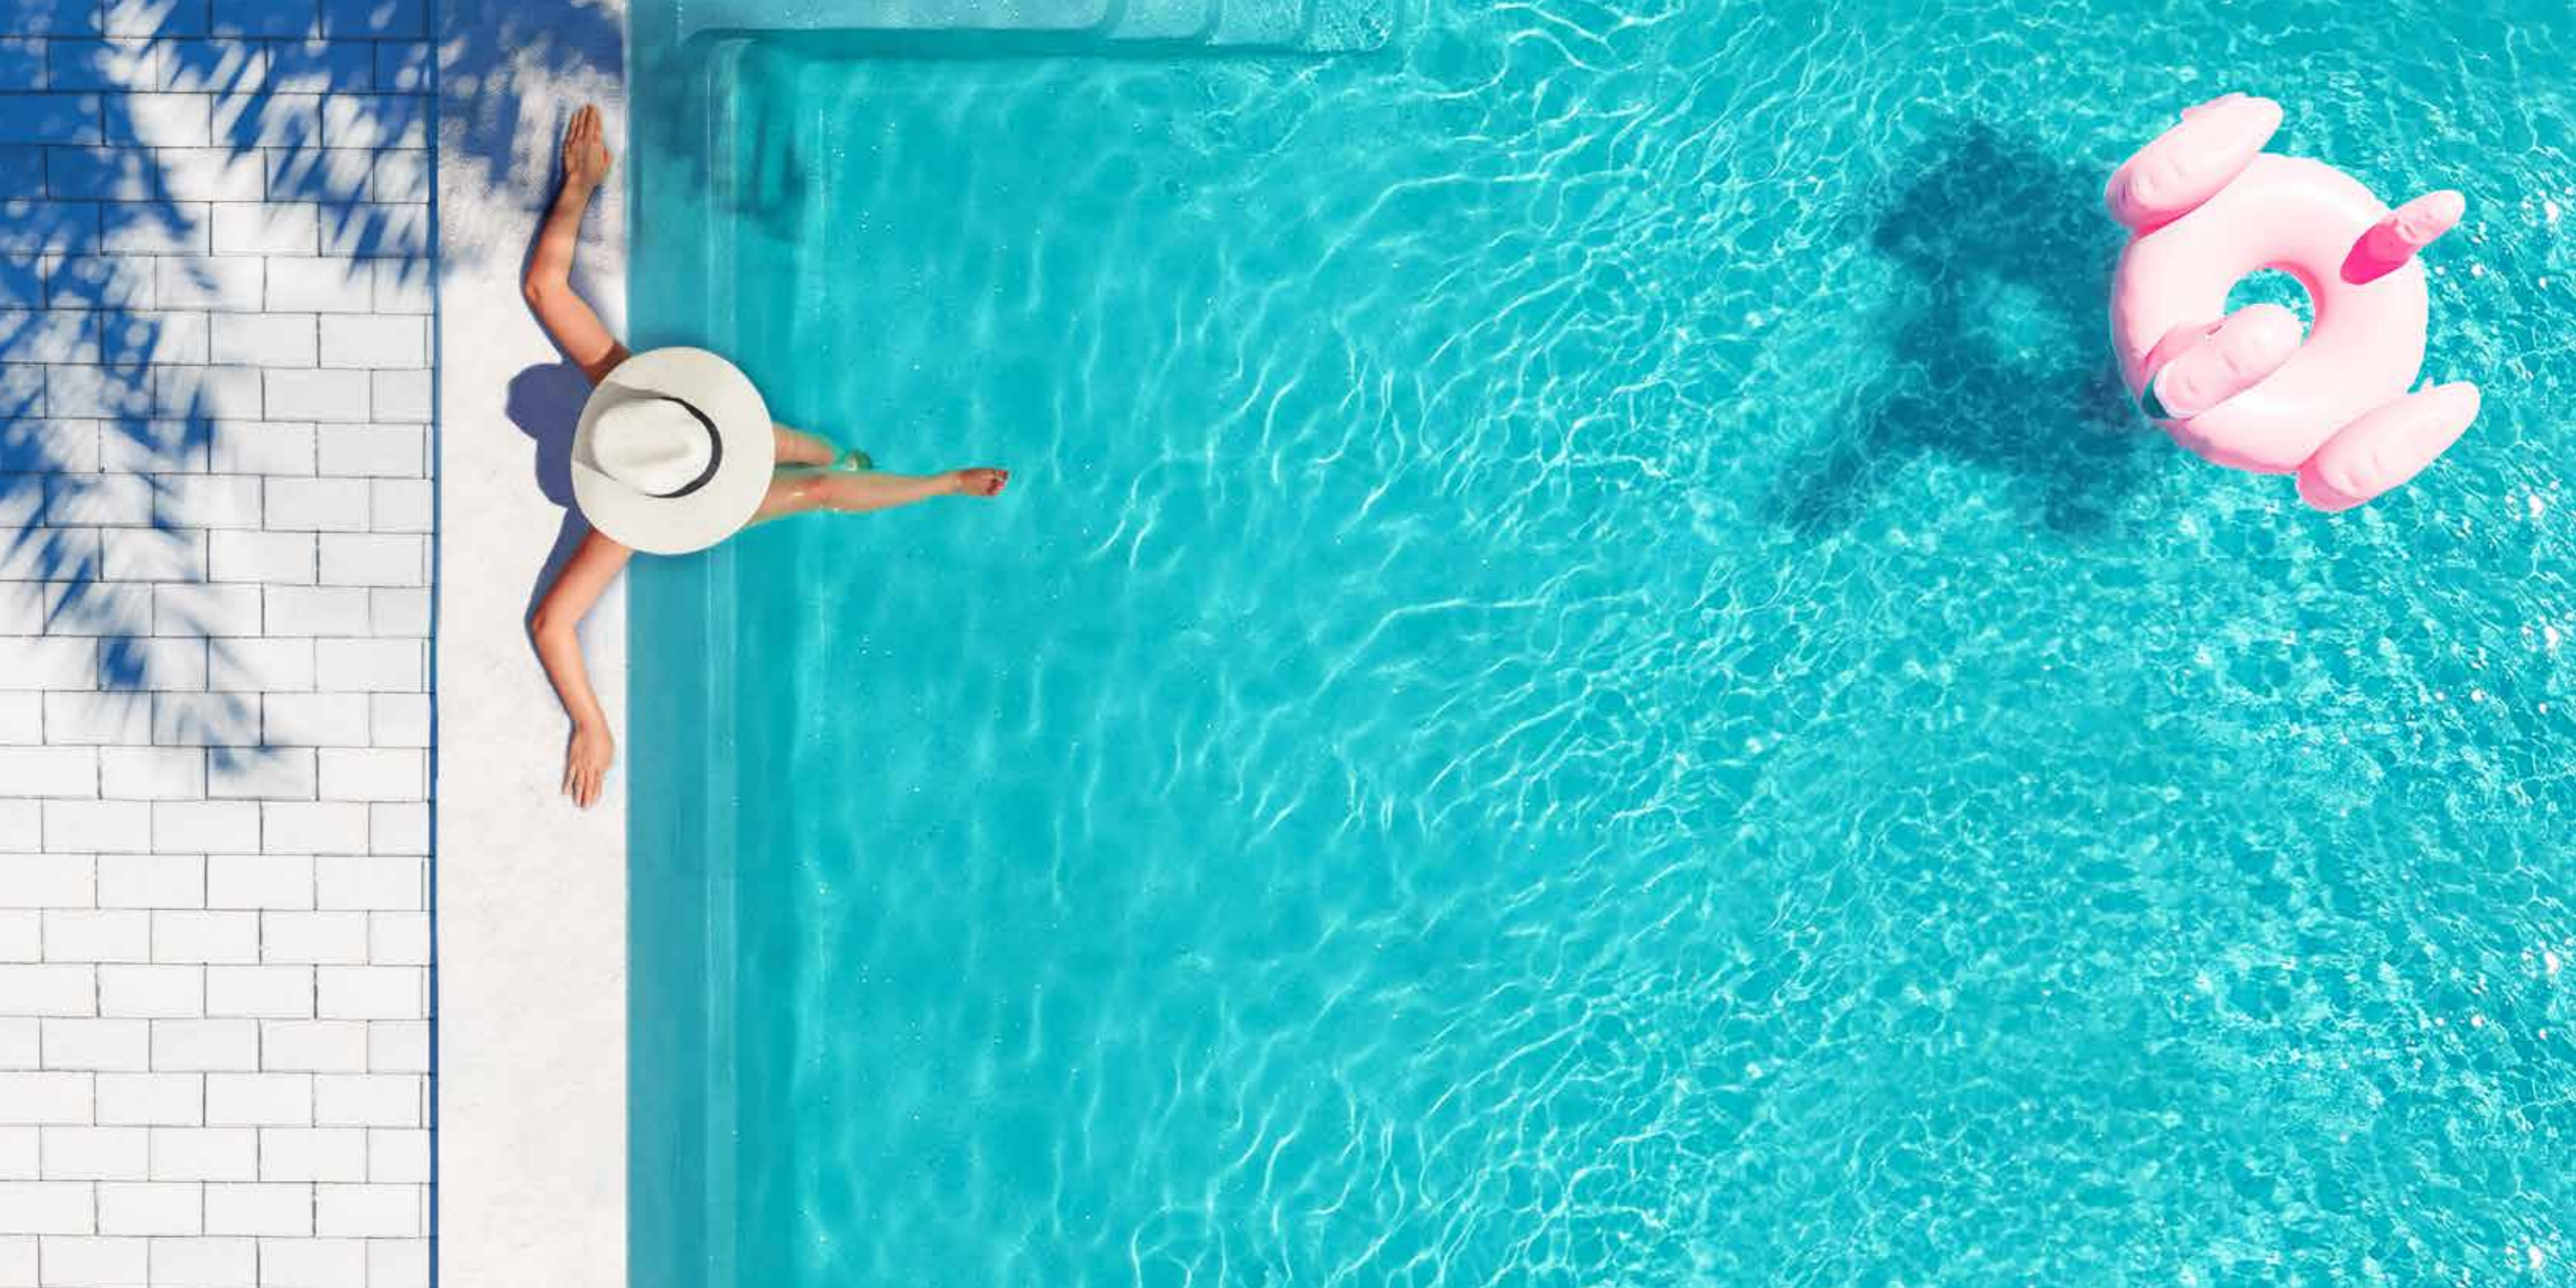

The EVi X is not only the ultimate training pool but is also ideal for families and larger spaces too.

Technical Drawings

Family Pack

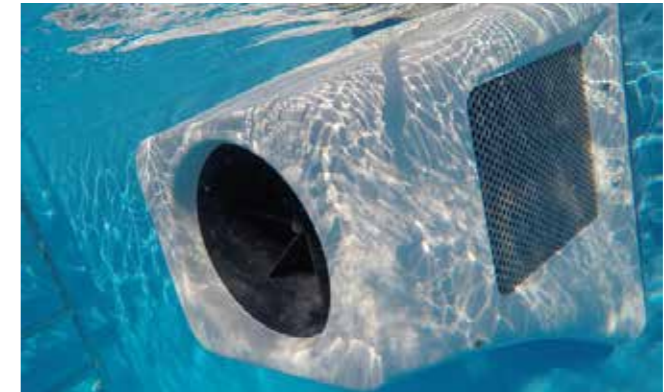

The Family Pack gives you that essential peace of mind, when it comes to keeping your family and pets safe.

In the event of a child or pet stepping out onto the pool the grey, slatted roller cover included in the family pack acts as an important safety barrier.

Also making your pool more economical by significantly reducing heat loss through the water surface.

Training Pack

The Training Pack is perfect for both serious swimmers and anyone looking to get started on their fitness journey.

The included turbine produces a counter current that is perfect for training in any size pool, by reducing turning time in the water and creating a natural resistance that can be adjusted to a level suitable for you.

The pack also includes electrical control box, remote control and cables to connect to the Pool Pod.

Simplicity Pack

Save your time and make things simple with the Simplicity Pack. This pack includes a high-specification cleaning robot and semi-automatic chlorine feeder to make maintaining your pool even easier.

Installation

Installation is made simple with EVi Pools.

We provide all the technical information you need to prepare for your EVi Pools delivery. Complete with all relevant information to finish the pool installation to the highest standard.

Each EVi shell includes an inbuilt insulation layer and pre-wired and plumbed Pool Pod including filtration and heat pump.

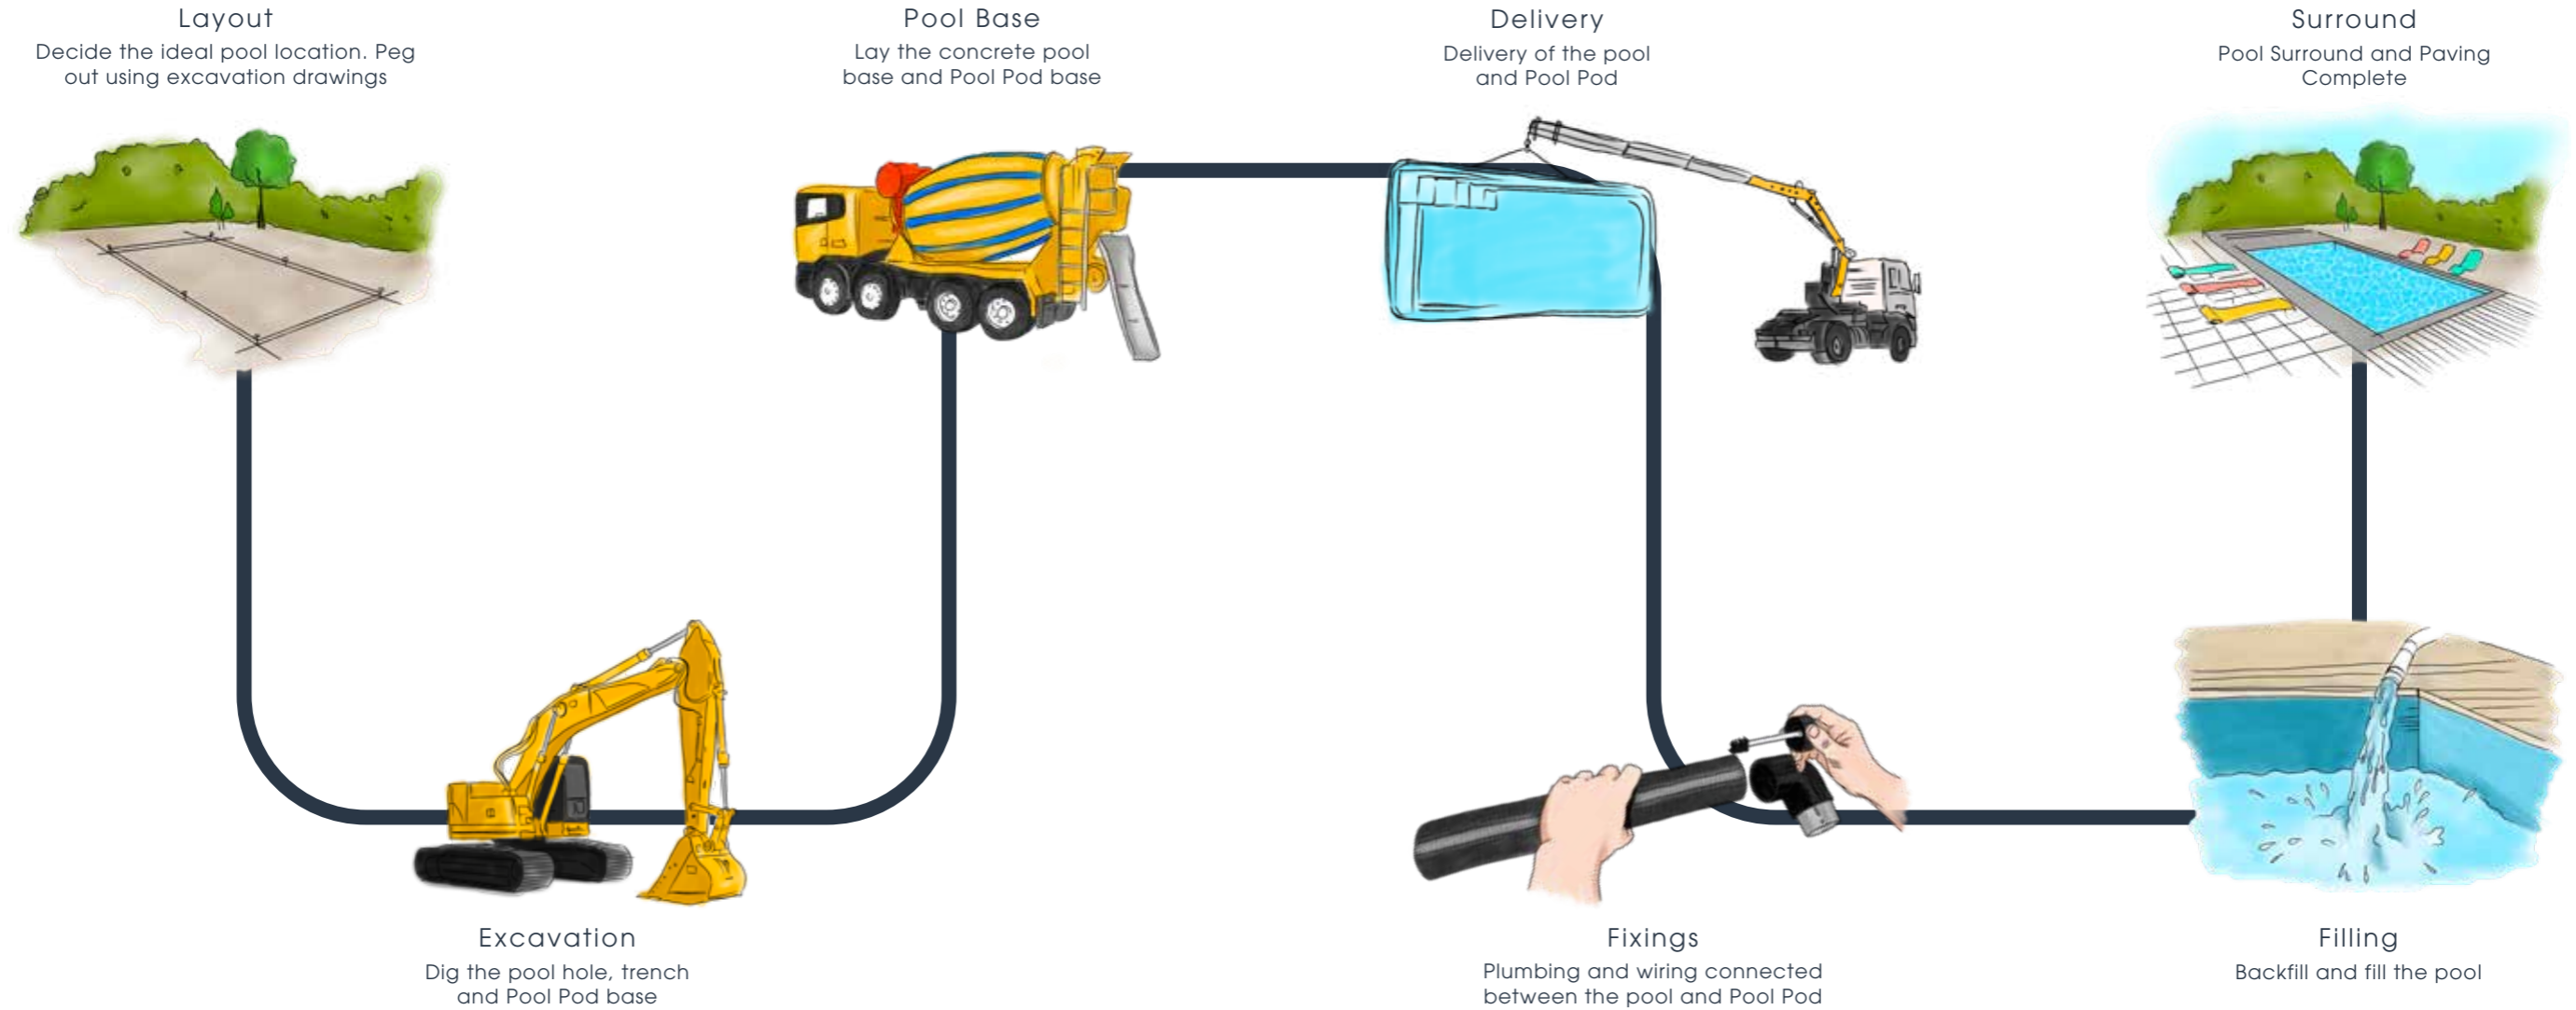

(Right) Pools ready for dispatch from EVi Pools distribution centre.
